3 Attempts Allowed

Details

This project represents an opportunity for self-directed study on a topic related to this course. A list of potential topics is available [here \(https://canvas.qut.edu.au/courses/24178/files/7856961?wrap=1\)](https://canvas.qut.edu.au/courses/24178/files/7856961?wrap=1) [↓ \(https://canvas.qut.edu.au/courses/24178/files/7856961/download?download_frd=1\)](https://canvas.qut.edu.au/courses/24178/files/7856961/download?download_frd=1) . Please select one or, preferably, purpose your own provided it has a practical element!

A five minute video is to be produced highlighting the:

- Topic
- Relevance to advanced robotics
- Experiments conducted (simulated and / or (preferably) real-world robot)
- Results and analysis
- Discussions (insight & meaning) and Conclusion

The three attempts means that if an upload gets corrupted you can easily reload another version. We will only mark the last version submitted by the handin date.

EGB439 Self Assigned Project								
Criteria	Ratings							Point
Definition of the core question in the project.	6 to >5.1 pts	5.1 to >4.5 pts	4.5 to >3.9 pts	3.9 to >3 pts	3 to >2.4 pts	2.4 to >0 pts	0 pts	/ 6 pt
	High Distinction	Distinction	Credit	Pass	Marginal Fail	Fail	NE	
	The research question is related to a real-world issue that can be addressed using the techniques relevant to the course.	The research question is clearly defined in the course and how the investigation extends the material covered.	The research question extends the work conducted in the course by analogy to other parts of the syllabus.	The research question exists that is related to the course, the learning outcomes and presented concepts. However, the question is easily	A question exists, but is trivial in nature.	Work provides minimal evidence of learning in relation to this criterion. Repetition of existing work only.	No evidence provided	

EGB439 Self Assigned Project

Criteria	Ratings							Point
				answered through the work covered in the course.				
Demonstrated depth of research and understanding of the topic.	4 to >3.4 pts High Distinction Substantial research into relevant peer-reviewed resources supporting the chosen topic. Clear insight provided into the topic, supported by practical results.	3.4 to >3 pts Distinction Research of important topics related to the subject chosen. Insight into the relevance and importance of the topic to Advanced robotics.	3 to >2.6 pts Credit Evidence of research beyond the presented course material. Clear demonstration of topic understanding by use of clear terminology, good descriptions of content and appropriate choice of techniques.	2.6 to >2 pts Pass Reports salient and relevant information of topics as covered by the course. Distills important relationships between the topics and the course.	2 to >1.6 pts Marginal Fail Correctly reports course information, but at a superficial level.	1.6 to >0 pts Fail Little research conducted as evidenced by incorrect terminology, misinformation and misinterpreting content.	0 pts NE No evidence provided	/ 4 pt
Ability to articulate the rationale behind the experimental design	6 to >5.1 pts High Distinction The 'what', 'how' and 'why' of the experiment, in terms of the experiments conducted. Clear insight into what the experiments mean for Advanced robotics and how the design of experiments supports the findings.	5.1 to >4.5 pts Distinction The 'what', 'how' and 'why' of the experiment, in terms of the experiments conducted. Plus potential failings and issues with the experiment.	4.5 to >3.9 pts Credit The 'what', 'how' and 'why' of the experiment, in terms of the experiments conducted.	3.9 to >3 pts Pass The 'what' and 'how' of the experiment, without 'why' it was conducted.	3 to >2.4 pts Marginal Fail The 'what' of the experiment, without the 'how' or 'why' it was conducted.	2.4 to >0 pts Fail Little rationale on the experiment conducted - simply showing without describing.	0 pts NE No evidence provided	/ 6 pt
Presentation of the results and in-depth analysis.	4 to >3.4 pts High Distinction High quality video (worthy of external distribution),	3.4 to >3 pts Distinction Good quality presentation with statistical analysis of	3 to >2.6 pts Credit Topics are clearly covered with related	2.6 to >2 pts Pass Topics covered in sufficient detail to transfer	2 to >1.6 pts Marginal Fail Topics covered in lack of detail (e.g. short video), and no	1.6 to >0 pts Fail Poor quality sound, visuals and text.	0 pts NE No evidence provided	/ 4 pt
